

Java

```
class Solution {  
    public int[] findColumnWidth(int[][] grid) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number[][]} grid  
 * @return {number[]}  
 */  
var findColumnWidth = function(grid) {  
  
};
```

C++

```
class Solution {  
public:  
    vector<int> findColumnWidth(vector<vector<int>>& grid) {  
  
    }  
};
```
